

MUHAMMAD JUNAID

AI Engineer | Python Developer | Generative AI, RAG & FastAPI

Pakistan | 0304-1659294 | junaidfazal08@gmail.com | [linkedin.com/in/muhammadjunaidai](https://www.linkedin.com/in/muhammadjunaidai) | github.com/muhammadjunaidai

Portfolio: muhammad-junaid-portfolio-gray.vercel.app

PROFESSIONAL SUMMARY

AI Engineer and Python developer with 4+ years of experience building production Generative AI systems — RAG pipelines, multi-agent workflows with LangChain and LangGraph, and scalable FastAPI backends — on a full-stack foundation across Python, Django, Flask, and Laravel. Delivered end-to-end AI and web applications from architecture through deployment for both internal teams and live client platforms. Seeking AI Engineer, LLM Engineer, or Python/FastAPI Developer roles.

TECHNICAL SKILLS

Programming: Python

AI & Machine Learning: Machine Learning, NLP, Scikit-learn, TensorFlow, Keras

Generative AI & LLM: Generative AI, LLMs, RAG, AI Agents, Prompt Engineering, LangChain, LangGraph, MCP (Model Context Protocol)

Backend & Frameworks: FastAPI, Django, Flask, Laravel (PHP), REST APIs

Databases: PostgreSQL, MySQL, SQLite, Vector Databases, SQLAlchemy, Django ORM

Frontend: React, JavaScript, HTML5, CSS3, Bootstrap

Tools & Platforms: Git/GitHub, Docker, Postman, Jupyter, Selenium, BeautifulSoup, n8n, Agile/Scrum

PROFESSIONAL EXPERIENCE

AI/ML Intern — NETSOL Technologies Inc.

Feb 2026 – Jun 2026 | Lahore, On-site

- Built RAG-based document query systems and trained predictive ML models with Scikit-learn and TensorFlow/Keras, enabling natural-language search over internal documents.
- Prototyped LLM/GenAI workflows for internal tooling within an Agile team, shipping production-ready AI-enabled features on schedule.

AI/ML & Generative AI Trainee — Corvit Systems

Nov 2025 – Jan 2026 | Lahore

- Built ML/DL models across the full lifecycle, from data preprocessing through deployment.
- Deployed a RAG agent to production using LangChain and LangGraph.
- Developed agentic AI prototypes implementing multi-step, tool-using agent workflows.

Python Web Development Intern (Flask & Django) — Knowledge Streams

Mar 2024 – Apr 2025 | Lahore, On-site

- Delivered 5+ Django web applications end-to-end and built documented Flask REST APIs with authentication.
- Optimized MySQL/PostgreSQL databases within an MVC architecture, improving API response times through query optimization and ORM tuning.

Full Stack Developer — Developers Point Private Limited

Jan 2022 – Jan 2024 | Multan, On-site

- Delivered 10+ client web applications using PHP/Laravel, from database design through deployment.
- Built REST APIs with RBAC-based authentication for React and mobile clients; improved database performance by ~30% while maintaining 99% uptime.

PROJECTS

SQLMind AI — Multi-agent LangGraph system converting natural language to secure SQL, with a validation agent and human-approval step before execution.

DocMind AI — Production RAG system for PDF, DOCX, and CSV documents, using Chroma vector search with source-cited answers.

Notebook2PDF AI — Automated Jupyter notebook-to-PDF conversion using a LangGraph Planner + Supervisor agent architecture.

Papa Meal — Corporate meal ordering platform (Laravel 11) with catering, drivers, multi-portals, Stripe/PayPal payments, and real-time updates via Pusher — 1,000+ users on the live platform.
